SOURCE

In early November 1952 we received a letter from [REDACTED] Livo, Belgian Congo, requesting price and delivery information on a short, compact, Go telescope which we manufacture for apartments. The following paragraphs are taken from [REDACTED] letter:

As you Americans do not want to tell us what the so-called 'flying saucers' are, and above all, what they want (and this may be very important in the future), I need your excellent telescope for myself and my observation group which I am just creating.

The UFO (Unidentified Flying Objects) are coming more and more over this country, and being perhaps the very cause of this land and its beautiful nights, we have look more often in the sky than the busy Americans.

When talking to the police, please remember that the parking must be almost error-placed, because otherwise the local vendors may destroy the telescope even before it reaches us."
